

I strongly oppose the FCC's proposed rule making to force radio stations to record their broadcast day and retain for 60-90 days! This in my opinion punishes the many for the sins of the few. It puts an tremendous hardship on small market stations with the capital investment it would take to accomplish the rule. We are in a very small market providing a great local service and have never recieved a single complaint. Punish those who do wrong but don't punish an entire industry for problems of two or three!
